Projects

Face Detection System with Landmark Estimation |

- Developed a deep learning model using PyTorch for face detection, achieving 95% accuracy.
- Trained on real-world datasets with data augmentation to improve accuracy. It handles small faces and varied conditions(blur, lighting, rotation and trained on 20k+ images (WIDER FACE + WFLW).

Face Recognition system(ResNet-18 + ArcFace)|

- Built a face recognition model from scratch using ResNet-18 + ArcFace, optimizing training stability and embedding quality to achieve robust identify verification.
